

Report date: 2026-07-01 16:17:36

Framework scanned: NSA

Severity	Control reference	Control name	Failed resources	All resources	Compliance score
Critical	C-0005	API server insecure port is enabled	0	1	100%
Critical	C-0069	Disable anonymous access to Kubelet service	0	0	100%
Critical	C-0070	Enforce Kubelet client TLS authentication	0	0	100%
High	C-0012	Applications credentials in configuration files	1	56	98%
High	C-0038	Host PID/IPC privileges	0	22	100%
High	C-0041	HostNetwork access	1	22	95%
High	C-0046	Insecure capabilities	1	22	95%
High	C-0057	Privileged container	0	22	100%
High	C-0059	CVE-2021-25742-nginx-ingress-snippet-annotation-vulnerability	0	0	100%
High	C-0270	Ensure CPU limits are set	8	22	64%
High	C-0271	Ensure memory limits are set	8	22	64%
Medium	C-0002	Prevent containers from allowing command execution	2	96	98%
Medium	C-0013	Non-root containers	9	22	59%
Medium	C-0016	Allow privilege escalation	2	22	91%
Medium	C-0030	Ingress and Egress blocked	2	29	93%
Medium	C-0034	Automatic mapping of service account	12	81	85%
Medium	C-0035	Administrative Roles	2	96	98%
Medium	C-0044	Container hostPort	1	22	95%
Medium	C-0054	Cluster internal networking	1	7	86%
Medium	C-0055	Linux hardening	2	22	91%
Medium	C-0058	CVE-2021-25741 - Using symlink for arbitrary host file system access.	0	0	100%
Medium	C-0066	Secret/etcd encryption enabled	1	1	0%
Medium	C-0067	Audit logs enabled	1	1	0%
Medium	C-0292	Nginx Ingress Controller End of Life	0	16	100%
Low	C-0017	Immutable container filesystem	2	22	91%
Low	C-0068	PSP enabled	1	1	0%
